

Disruptive Business Model: Grihamm – The Home Transformation Engine

“From floor plan to flawless finish – India's first AI-powered, on-demand interior execution platform with embedded commerce.”

Category Redefinition: From Design Platform to Execution Engine

Instead of building another “interior design platform,” **Grihamm** is a **Home Transformation Engine** – a full-stack, API-connected operating system that redefines:

Old Industry	Grihamm
Designer-led, service-based	Productized, outcome-based
Manual consultation	AI-first guided design
Fragmented vendors	Embedded commerce & BOM-based execution
Risky contractors	Certified, performance-rated execution teams
No benchmarks	Uber-like visibility, SLAs, fixed delivery timelines
Siloed solutions	One-click renovation

Core Model Framework

1. AI Design + Pricing Engine (DesignGPT)

“Answer seven questions → get your 3D dream home layout + fixed price in 30 minutes.”

- AI turns inputs (floor plan, budget, style) into:
 - Auto-layouts
 - 3D renders

- Bill of Materials (BOM)
- Time + cost estimate

- ✓ Enables **DIY users** to create their home interior experience
 - ✓ Makes the process faster and scalable
-

2. Embedded Commerce Marketplace

Direct BOM-to-cart procurement with integrated delivery.

- Auto-adds all required tiles, lights, curtains, wood, and panels into your cart.
- Pricing benchmarked across top brands.
- Delivery synchronized with project milestones

- ✓ Turns the **material procurement process into a commerce engine**
 - ✓ Monetizes each item in BOM – recurring revenue built into design
-

3. Execution Network-as-a-Service (XaaS)

Verified, SLA-bound, tech-enabled contractors & supervisors

- Uber-like assignment based on quality score + proximity
- Contractors earn performance badges, get re-training, or receive discounts.
- Intelligent workflows guide them (milestones, material use, checklists)

- ✓ Execution is **standardized and trusted**
 - ✓ Quality is no longer dependent on local “jugaad”
-

4. ProjectOS – Track Everything

For the first time, users track their home project like a Zomato order

- See progress: design → delivery → installation

- Visual progress updates, delay alerts, contractor chat, payment dashboard
- QC snapshots are uploaded at each stage.

- ✓ Solves the #1 problem: **no visibility**
- ✓ Enables control, trust, and documentation

5. B2B Growth Engine

For builders, NRIs, rental managers, and decor retailers

- APIs for builders to auto-integrate interiors at flat booking
- NRIs can design/execute fully remote.
- Vendors pay to get featured in BOM flows.

- ✓ **Revenue from SaaS, licensing, and bulk execution**
-

Revenue Model

Stream	Description
 Project Fees	Flat % commission on every full interior execution (15–25%)
 Design Pro	₹999–₹4,999 for AI+expert iterations
 Embedded Commerce	8–15% markup or commission on BOM item sales
 Fulfillment Network	Contractors pay monthly fees for leads + rating boost
 Supplier SaaS	Subscription fee + sponsored listings in BOM
 AMC	Annual maintenance plans, reworks, upgrades

Growth Flywheel

1. **AI Design = Lead Magnet**

Free or ₹199 design simulator → Lead

2. **Execution = Revenue**

Convert designs to turnkey projects.

3. **Commerce = Margin Layer**

BOM auto-converts to material orders

4. **Quality = Retention**

ProjectOS ensures a 4.5★+ experience.

5. **Network = Scale**

More projects → More vendors → Better pricing → More projects

Competitive Advantage Summary

Feature / Competitor	Griham m	Livspace	HomeLan e	Urban Company	Nirwana.A I
AI-Driven Smart Design	✓	✗	✗	✗	✓
BOM → Commerce Integration	✓	✗	✗	✗	✗
Execution SLA + Tracking	✓	✗	✗	✗	✗
Supplier SaaS / Marketplace	✓	✗	✗	✗	✗
Full-stack + Scalable	✓	✗ (asset-heavy)	✗	✗ (gig-only)	✗

Sustainability + Profitability Built-In

- Zero inventory holding (partnered vendors)
 - Scalable fulfillment (networked, not owned)
 - Positive unit economics from day 1
 - AI reduces design cost by 80% compared to a human designer.s
 - Predictive analytics optimizes the supply chain.
-

Phase-Wise Launch Plan

Phase	Cities	Focus
1	Bangalore, Pune	Kitchens + 2BHK Interiors
2	Hyderabad, NCR	Add Bedrooms + Smart Decor
3	Mumbai, Chennai	Expand BOM vendors
4	Tier 2 Cities	Launch “Lite” version with pre-bundled kits

Investor Hook

“Grihamm is the Uber + Amazon + Canva of Home Transformation”

- Disrupts ₹1.5L Cr mass-market space
 - AI-first, commerce-embedded model with zero inventory
 - Full-stack control + data = recurring margin advantage
 - Monetizes **design + execution + materials, + tools** at once
 - A **real platform**, not a service agency
-
